

LANEWAY TREATMENT TRIAL

FACT SHEET

Council is trialling treatments in 11 laneways across three Palmerston suburbs (*Moulden, Gray and Woodroffe*) to discourage the occurrence of anti-social behaviour.

The treatments being trialled in the laneways includes one of the following:

› installing smart LED lighting to:

- effectively illuminate the laneway to increase passive surveillance
- discourage vandalism and anti-social behaviour
- trial lighting levels and hours of lighting

› temporarily closing laneways, with the hours of closure to be determined by a technical assessment and informed by the results of the public consultation.

LANEWAY LOCATIONS

The 11 laneways selected for the trial and the treatment they will have applied are shown on the map attached.

HAVE YOUR SAY

Council will be speaking to residents, neighbours, laneway users and nearby stakeholders to find out how they use the laneways before lighting is installed and temporary closures enacted.

If you live nearby or use one of the laneways included in this trial, we encourage you to provide your feedback at www.palmerston.nt.gov.au

This information will help inform a review of Council's laneway policy.

NEXT STEPS

Council anticipates treatments will be in place and effective by April 2019. Some of these treatments may be in place sooner.

After the treatments have been in place for at least two months, Council will undertake a second round of community consultation to determine the effectiveness of the treatment measures.

If the treatments trialled are effective and supported, they may remain in place, however if they are not successful, they will be reviewed by Council.

CONTACT

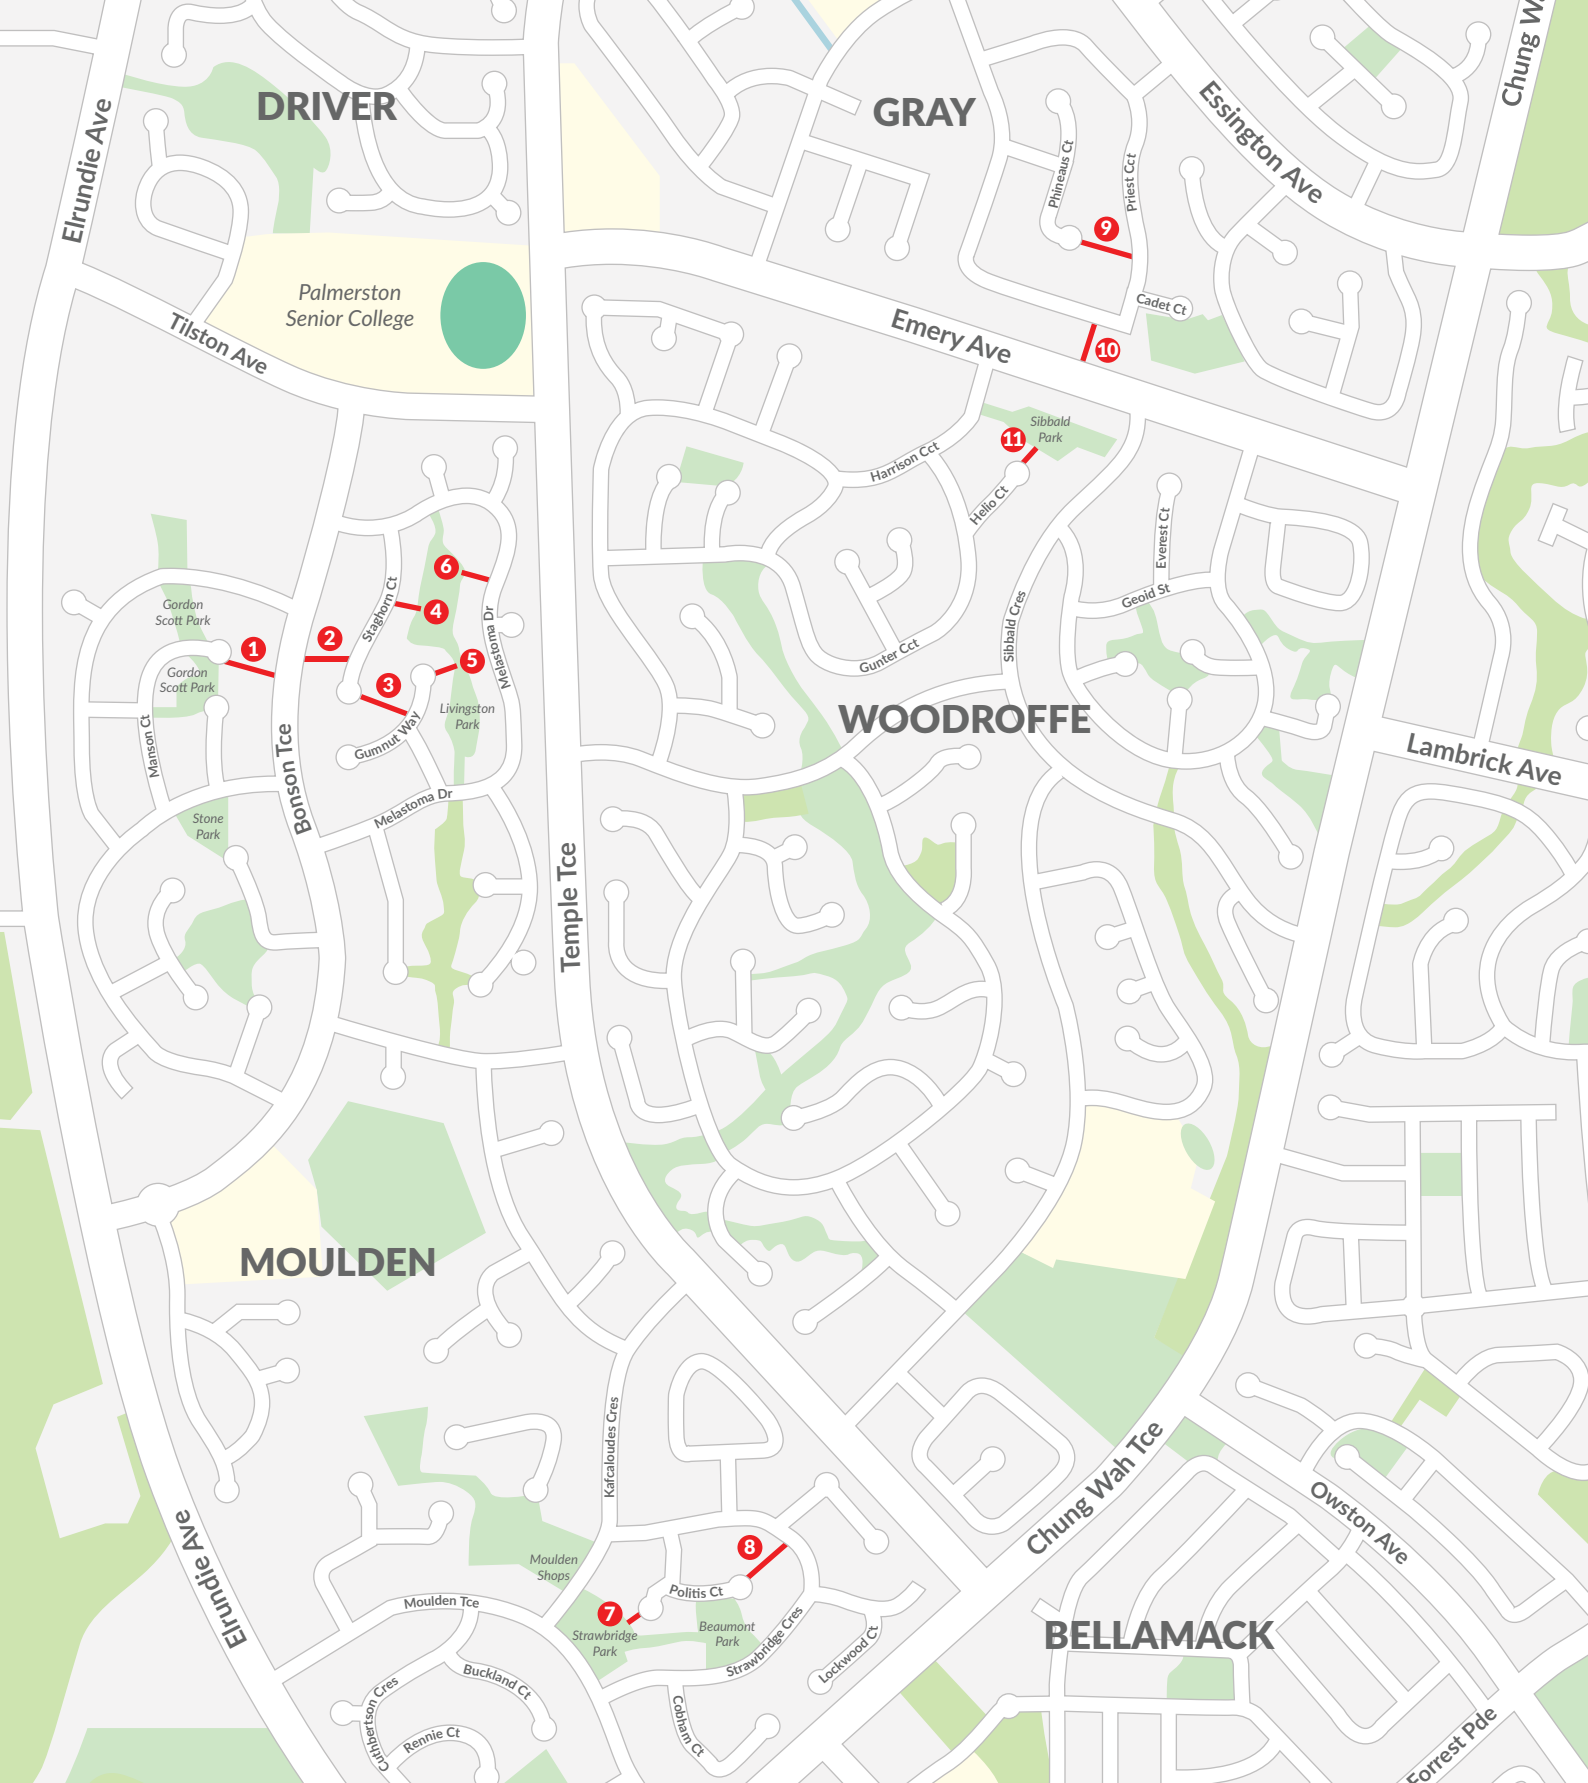

If you would like to discuss the consultation or have any other questions, please contact Council by:
