

# ACCESS & ENTRY CONDITIONS

## VEHICLE SIZE

The City of Palmerston considers the safe manoeuvring of traffic within the site and in particular, at the general waste area, as paramount.

Your vehicle size and load needs to be able to manoeuvre, operate and ensure it does not compromise the safety or operation of normal domestic vehicles nor should it require the temporary closure of the site to other users.

Should the vehicle size and/or load not be able to manoeuvre or deposit waste safely within the site or contain material that is not considered to be domestic in nature, you will be directed to an alternative facility i.e. Shoal Bay Waste Management Facility.

**Loads of excessive amounts of soil, gravel, building materials or concrete WILL NOT be accepted.  
Tipping of material from large vehicles at the general waste area is PROHIBITED.**

**Users of the site are required to obey all direction given by staff on the site.**

**Telephone: 8935 9922**
