CITY OF PALMERSTON SWELL PROJECT CONSTRUCTION

City of Palmerston's SWELL (Swimming, Wellness, Events, Leisure and Lifestyle) project is happening!

The SWELL project is Palmerston's largest infrastructure project to date and is set to transform the current aging Palmerston Swimming and Fitness Centre into a leisure hub.

The SWELL project will provide Palmerston residents with a state of the art, contemporary and family friendly, water and lifestyle precinct, with upgrades including:

- refurbishment of the 50-metre pool
- a toddlers zero depth and play pool
- an events area
- basketball half court
- new and improved accessible toilets and change rooms
- aquatic play structure
- energy efficient, modern pool plant and equipment and shade features

The new complex is an important community asset, and the redevelopment will see it cater to a wider range of interests to support Palmerston's growing population.

Once complete, SWELL will be open to all community members and City of Palmerston will continue to provide free access to the facility for all users until 1 July 2026, after which time this will be reviewed by Council.

ABOUT CONSTRUCTION

Early stages of construction will begin in August 2022 and take approximately 14 months to complete, with the new facility expected to open in November 2023.

The Palmerston swimming pool will be closed from 20 August 2022 to enable works to begin on the new, state of the art SWELL aquatic and leisure precinct. The café and fitness centre will remain open, and any disruptions to services will be communicated to users and local residents in advance.

City of Palmerston is working with contractor Jaytex Construction to ensure the impacts of construction on surrounding residents, schools and businesses are managed. Measures will be in place to minimise the impacts caused by construction, including the timing of works, traffic management, waste management, and noise and safety measures.

Those impacted by disruptive works or night works will receive advance notice and City of Palmerston will work with stakeholders to ensure business operations can continue throughout construction.

FUNDING

The project is funded by the Australian Government, with \$5 million secured through the Building Better Regions Fund, as well as the Northern Territory Government contributing \$7.5 million and City of Palmerston contributing \$6.9 million.
